Consultation Dates

Lata - Courtesy call to Provincial Executive Board	17/7/2019
Lata - Provincial Stakeholders	17/7/2019

Lata - Community stakeholders	18/7/2019
-------------------------------	-----------

Introduction

The Team deployed from Honiara on Tuesday 16th July 2019 at 11:40am to Santa Cruz Island (Capital Lata). The first and foremost according to the plan schedule and protocol was a courtesy visit to the Provincial Government, on Wednesday 17th, the first day with almost all of the Temotu's newly elected Provincial Members as our key informants. This was then followed by a consultation meeting with provincial stakeholders (NGOs, SOEs, FBO, and the Provincial Ministries). Thursday 18th was consultation with community representatives from nine islands of Temotu Province. On Friday 19th July, the planning team was privileged to meet again with the new Executives and present what the people of Temotu say about the Ocean Planning.

Results and Feedback

17. / 19. July 2019 – Lata - Provincial Government Executives

General Discussion:

- There is high dependency on ecosystems and the ocean is one with high importance
- For proper understanding ocean needs to be defined clearly
- Destructive development approved by national government is a concern and ocean planning needs to include this to mitigate this

Figure 2 Temotu Provincial Government Executives

Questions answered in writing by Provincial Government Executives:

What are some challenges /gaps in ocean management?

- Need to provide a good understanding with the Provincial Government to create Provincial Government Ordinance to protect our Ocean.
- Lack of information on respective Ministry, leaving ignorant of how to manage.
- No proper provincial ordinance that pass to protect our ocean.
- People do not know that we depend on ocean for our entire living.
- Existing National/International laws regarding oceans, resources (Pelagic/Non-pelagic), fisheries and others, in our EEZ/12 miles Territorial waters need to be known so that we can work from there to create policies to safeguard our oceans.

What are your ideas for Better Ocean planning/development?

- The awareness should be done every 2, 3 months to strengthen the mind-set of the people in the rural areas for better planning and development in our good Oceans.

- The office concerned should move education awareness to communities throughout the country.
- The responsible communities with their various territory should care and protect their marine ecosystem.
- All stakeholders to participate in policy formulations.

Your opinion, how can we achieve ocean objectives? SINOP?

- The Ocean 12 process should set up community Ocean management group to work alongside with the Provincial Government to implement the vision and the mission for the betterment of our people.
- My opinion is to have community feedback.
- The Government should reach out to rural to educate them on how they should care for the ocean.
- Inclusion of Provincial Governments in the Ocean 12 to achieve good, inclusive and sound SINOP.
- Include resource owners in policy formulations – parts of the ocean are customary owned. In effect, wider consultations.

17. July 2018 - Lata - Stakeholders: NGOs, FBOs, SOEs, Community Representatives

Group 1: Patrick Melema, Francis Badengo, Charles Natebe, William Kezy, George Boape

Questions	Costal	Offshore
What activities currently exist in the ocean (economic, cultural, social and management)?	<p>Economical Activities (yellow)</p> <ul style="list-style-type: none"> • Logging near coastal Area, • Fishing • Anchorage <p>Social/Cultural Activities</p> <ul style="list-style-type: none"> • Daily Collection - Fishing –Livelihood • Refuse disposal • mangrove use 	<ul style="list-style-type: none"> • Commercial fishing
What activities would you like to see where?	<ul style="list-style-type: none"> • MPA – Short Term (white) • -Permanent (Blue) • Education and Awareness on ocean use leaders/Chiefs/schools/youths/women and Individuals • Coastal Management • Coastal Ocean Clean Up Campaign 	<ul style="list-style-type: none"> • Tuna fishing – offshore seas

What activities do you think should be stopped or restricted?

- | | |
|--|---|
| <ul style="list-style-type: none"> • Logging – Awareness before LOs Make decision –Tug Boat pulling Log Crafts along coastal Area • Mining – Strengthening of legal institutions • Restricted fishing methods – Night Diving – Net Fishing restricted of small hooks fishing gears • No disposal of waste or ship ballast water on the ocean • Open defecation? | <ul style="list-style-type: none"> • Prospecting of deep sea mining • Driftnet fishing • Catching of whales, turtles |
|--|---|

Tell us the best way to keep you informed or involved.

- SPREP activity should be extended to Provincial level
- Information flow down to rural areas

What do you think of ocean planning? What are your reasons?

- Regional ocean clean-up campaign because oceans are connected to other countries
- Education awareness to institutions because of younger generation are the future user of Ocean

One day there will be an “Ocean law” – what do you think should be included/considered?

- Banning of ocean refuse disposal
- Recycling of hard refuses

Points raised in their feedback of the group work:

- The group realized the need for ocean planning and the inclusion of different stakeholders
- Protection for maximum benefits for our ocean

Figure 3 Mapping activities in Lata

Group 2: Rosemary Tea, Malasy Juniour, Atabau Tego, Judy Inapi, Luke Paul Taula

Questions	Costal	Offshore
What activities currently exist in the ocean (economic, cultural, social and management)?	(White) <ul style="list-style-type: none"> • Fishing grounds • Illegal Fishing Activities by foreign vessels • Logging • Dumping of domestic wastes • Shipping routes • MPA s (blue) • Destructive fishing methods from foreigners 	<ul style="list-style-type: none"> • (red line) – shipping lane (White) <ul style="list-style-type: none"> • Commercial fishing • IUU fishing (Illegal, unreported and unregulated fishing)
What activities would you like to see where?	(Yellow) <ul style="list-style-type: none"> • Effective monitoring system for foreign fishing vessels • Graciosa Bay historical zone (Mendana Landing Site) • Introducing FADS around the whole Island of Santa Cruz • Tourism * Historical Sites for Vanikoro and Nukapu 	(blue) <ul style="list-style-type: none"> • Control and surveillance monitoring system

What activities do you think should be stopped or restricted?	<ul style="list-style-type: none"> • Logging Activities • Illegal Fishing Methods • Destructive fishing methods • Dumping of waste at both coastal and high sea • Stop importing undersize fishing gill nets 	<ul style="list-style-type: none"> • IUU • Damping of waste into open sea
---	---	---

Tell us the best way to keep you informed or involved.

Several follow-up visits to give feedback

What do you think of ocean planning? What are your reasons?

Is a way forward for ocean management – cos it will create effective ocean management system

One day there will be an “Ocean law” – what do you think should be included/considered?

Consider existing traditional governance

Points raised in their feedback of the group work:

- Every family has access to the ocean
- Usefulness of the ocean including the concern that more resources are needed and that protection of resources is needed

Group 3: Ellen Navi, George Tego, Henry Melanoli, Daniel Vagi, Clement Dagi

Questions	Costal	Offshore
What activities currently exist in the ocean (economic, cultural, social and management)?	1 White – existing management area (Malo, Matu, Luova, Nea, Nupani, Reefs)	<ul style="list-style-type: none"> • Tuna Fishing
What activities would you like to see where?	2 Blue Reforestation –(Vanikoro, Nedo) 5 Yellow – Proposed mangrove – protection area Turtle protection area	<ul style="list-style-type: none"> • 1. (Yellow) – Deep Sea mining • 2. (White) – Sustainable harvesting of tuna • 3. (Blue) – Tough control on security to counter illegal fishing

<p>What activities do you think should be stopped or restricted?</p>	<p>3 Yellow – Now Logging (Santa Cruz, Utupua, Duffs) (1) 4 yellow – No Mining and sea Mining (Duff, Vanikoro, Santa Cruz)</p>	<ul style="list-style-type: none"> • Deep sea Mining • Logging
---	---	--

Tell us the best way to keep you informed or involved.

Through consultations

What do you think of ocean planning? What are your reasons?

- Very brilliant concept
- Food resource, income (development)

One day there will be an “Ocean law” – what do you think should be included/considered

- Consider resources owners
- Proper and ample consultation with resource owners

Points raised in their feedback of the group work:

- Some of the activities have negative impact
- We are custodians of the ocean

Group 4: Vincent Dawea, Desmo Rex Neve, Michael Papo, Chris, Priscilla Cosmo, Patteson Kovo, Harry Mallock

Questions	Costal	Offshore
<p>What activities currently exist in the ocean (economic, cultural, social and management)?</p>	<p>Blue stickers:</p> <ul style="list-style-type: none"> • Immigration and Customs • Deep sea mining • Logging • MPA • Small Scale Fishing • Shipping Activities 	<p>Blue</p> <ul style="list-style-type: none"> • Tuna fishing (Commercial) • Logging • Prospective mining • Shipping route (cruise ship, logging ship, yacht) • Land mining

What activities would you like to see where?	White Stickers: <ul style="list-style-type: none"> • Tourism • Fisheries • Forest/Reforestation • Sustainable Milling of timber • Marine conservation 	<ul style="list-style-type: none"> • Tourism • Reforestation • Marine conservation • Aquaculture
What activities do you think should be stopped or restricted?	Yellow stickers: <ul style="list-style-type: none"> • Logging • Deep sea mining • Land Mining 	Yellow: <ul style="list-style-type: none"> • Logging • Mining (deep sea and land) • Illegal fishing • Coral breaking

Tell us the best way to keep you informed or involved.

- Awareness
- Education
- Media
- Communication

What do you think of ocean planning? What are your reasons?

- Management (marine ecosystem and resources)
- brings social, economic and cultural benefits

One day there will be an “Ocean law” – what do you think should be included/considered

- Local Government (Involvement, schools, Churches) and government
- Waste Management
- National Security (Border Control, Immigration and Custom, Police) (illegal fishing)
- Nationwide (Conservation)

Points raised in their feedback of the group work:

- National security: Temotu is entry port and responsible for keeping the border, immigration and emigration. This needs to be included in the ocean policy.
- Activities: overfishing of marine life and blue boats -> how will we manage and preserve our resource the ocean?

General Findings and discussion points raised

- Provincial Government need to be involved in connecting through the future planning process and find best practices of compliances and enforcement eg. land issues/threats are issues that affecting the ocean NEED proper management
- Participants always raised the end product of this process and the policy directions
- The issues of Ownership
- Rubbish dumping around Islands
- Open defecation in the ocean or near the ocean is a threat
- Ocean needs to be defined
- Ocean policy needs to overcome the sectoral approach
- How will national gov implement the ocean policy if they are not able to implement existing laws and regulations? And if they allow logging and imports that create waste in the country?
- There need to be benefits now: alternatives for livelihood generation as MPAs are developed
- There is ongoing ecosystem destruction: example: there are no green snakes in Duff Islands anymore. Resources need to be protected
- We should start with the coastline in front of our own doors. Start with cleaning the coastline and manage the coast before going to the offshore areas.
- The Ocean Policy should have come a long time ago. We need to embrace that the ocean policy belongs to us. Holistic approach is appreciated
- We need to care for the ocean, ownership and responsibility needs to be increased. Do awareness at local level with local leaders and responsible persons that can enforce the ocean law in the communities.
- Science and education are important
- At the international level, gov needs to make sure that neighbouring countries are protecting their ocean as well (everything is connected)
- Include the government agency responsible for waste management in the ocean management
- Inviting logging into the country was inviting disaster into the country.
- The national level is not enough, implementation and enforcement needs to happen at the local level as well.
- Ocean planning is a challenge
- The importance of ocean planning is acknowledged. This effort needs to be maintained.
- Appreciation of the participatory approach.
- More educational awareness for communities especially on all matters of environmental protection but also on general work that is happening at regional level (example: the work of SPREP is not known at community level)

Ocean stories from Temotu:

- Shark fishing with outrigger canoe

- Cooking with saltwater from the ocean
- Turtle fishing with net made of coconut fibre
- Using spiderwebs as bait

18. July 2019 – Lata - Stakeholders: Communities

Figure 4 Community representatives in Lata

Group 1: Iespo Nodua Stanley Huna, Pattson, Tom, Robinson, Casper, Meti Boniface, John Tawake

Questions	Costal	Offshore
What activities currently exist in the ocean (economic, cultural, social and management)?	White 1 = Logging White 3 = mining tenements Blue 4 & 1= fishing (artisanal, subsistence) Yellow 1 = locally managed area	Yellow 1 = Foreign Fishing Vessels Yellow 1.1 = Domestic Fishing Vessel Blue = International entry point
What activities would you like to see where?	Yellow 2 = sustainable harvest of trees Blue 4 = Sustainable fishing practices Yellow 1 = propose managed areas	White = Monitoring and surveillance (Fishing Activities & Foreign vessel entry)
What activities do you think should be stopped or restricted?	Blue 1 = Commercial fishing	Blue 1 = Under sea mining

	# No logging everywhere on Santa Cruz Islands, we want only sustainable harvesting # Mining	
--	--	--

Tell us the best way to keep you informed or involved.

1. Media
2. Tele-communication
3. Provide report
4. Have a focal person to relay information

What do you think of ocean planning? What are your reasons?

- Very good (first of its kind)
- community ideas are taken on board
- Because it will benefit us and future generations
- Due to proper planning for management.

One day there will be an “Ocean law” – what do you think should be included/considered?

- Best interest of local people (especially bottom-up approach)
- Recognise and enforce local governance and by-laws
- Fines/Penalties must be given to provincial government.

Group 2: Francis Barnabas Balua, James Meplana, Robinson Suiga, Dennis Limaloa, Edgar Vahi, David Villi, Talika John

Questions	Coastal	Offshore
What activities currently exist in the ocean (economic, cultural, social and management)?	White 1 = Marine Protected Area/LMMA White 2 = Logging activities White 3 = Fishing ground (daily) White 4 = Seaweed farming White 5 = No waste disposal	Blue 1 = Evidence of Illegal fishing boats seen (IUU fishing boats) Blue 2 = Evidence of wastes disposed by IUU fishing boats
What activities would you like to see where?	Blue 1 = Tourism site (marine conservation)	Yellow 1 = Vessel Monitoring System to be station in all Provincial Headquarters. (Radar) that can detect IUU fishing boats
What activities do you think should be stopped or restricted?	Yellow 1 = Undersea mining Yellow 2 = Logging	White 1 = Illegal fishing boats presence in our waters.

	Yellow 3 = Waste disposal – coastal area Yellow 4 = No logging activity	
--	--	--

Tell us the best way to keep you informed or involved.

- Improve and increase communications
- Revived SIBC Lata

What do you think of ocean planning? What are your reasons?

This is good because it involves many Ministries; Resources we will benefit will be protected.

One day there will be an “Ocean law” – what do you think should be included/considered?

- No mining – Undersea
- Traditional Law enforcement (community leaders, church leaders)

Group 3: Luke Menoni, Wilson Vamalo, Matthew Malau, George West, Christopher Sapo, Douglas Tela, Rolland Neio

Key: # = general

Questions	Coastal	Offshore
What activities currently exist in the ocean (economic, cultural, social and management)?	Yellow 1 = Marine Protected Area Yellow 2 = Logging Yellow 3 = Fishing Ground Area Yellow 4 = Coral Mining Yellow 5 = Fish poaching	Yellow 1 = Fish Poaching Yellow 2 = Offshore Mining (Prospecting) Yellow 3 = Noro Cannery
What activities would you like to see where?	Blue 1 = Tourism industry Blue 2 = Fishing Industry Blue 3 = Cultural Industries	White 1 = Tourism Industry White 2 = Fishing Industry
What activities do you think should be stopped or restricted?	White 1 = Logging (should only be sustainable harvesting) White 1 = Mining (Land and off-shore mining) White 1 = fish poaching (should be controlled)	# Fish Pouching (should be monitored frequently) # Offshore prospecting (Mining)

Tell us the best way to keep you informed or involved.

Tele communication

What do you think of ocean planning? What are your reasons?

Best way to manage and sustain our Marine resources for the benefit of now and future generation.

One day there will be an “Ocean law” – what do you think should be included/considered?

Revenue earned should be shared according to usage of Marine resources.

GROUP 4: Bartholomew Samui, Walter Talua, John Marklango, Elwyn Silu, Michael Kou, Fr Johnson Moli

Legend: Yellow = Q1, Blue = Q2 and White = Q3

Questions	Coastal	Offshore
What activities currently exist in the ocean (economic, cultural, social and management)?	Yellow 1 = Logging (Graciosa Bay, Nelua, Nooka) Yellow 2 = MPA (local) (Malo, Luova, Matu, Lagoon) Yellow 3 = Small scale fishing - hotspot for snapper, kingfish, dogfish Yellow 4 = Small scale fishing – yellowfin, bonito Yellow 5 = Small scale fishing hotspot for snapper, rainbow, grouper Yellow 6 = Illegal fishing	Yellow 1 = Commercial Tuna Fishing Yellow 2 = Illegal Fishing Yellow 3 = Domestic Shipping Yellow 4 = International Shipping
What activities would you like to see where?	Blue 1 = Tourism – Luova, Lagoon, Nemia Island, K/Bay, Bimber Lake Blue 2 = International Seaport – Graciosa Bay Blue 3 = Cannery – Nangu Blue 4 = MPAs – Nemia Is, K/Bay, Lord Howe Blue 5 = Police security and surveillance	Blue 1 = Surveillance Blue 2 = Commercial Fishing Blue 3 = International Shipping route to Vanuatu
What activities do you think should be stopped or restricted?	White 1 = Mining (Deep sea) White 2 = Land mining White 3 = Logging White 4 = Illegal fishing	White 1 = Deep Sea Mining White 2 = Illegal Fishing

Tell us the best way to keep you informed or involved.

- Through Media; Communication
- Awareness program through schools, churches, Provincial Government and Communities
- Training & Workshops for communities

What do you think of ocean planning? What are your reasons?

- Ocean Planning is an important tool for a way forward for fisheries and ocean management

One day there will be an “Ocean law” – what do you think should be included/considered?

- Traditional Governance (Chief System) be empowered to execute the Ocean Law.

General Findings and discussion points raised

- The government gets revenue but what stays within the communities?
- Only people initiating logging benefit, others not. What is the opinion of the government concerning this?
- The government is causing problems and should come down here to see and act
- The environment is damaged already, this process should be faster
- What is government doing to protect our fishing grounds? There are illegal fishing activities, we must place security on our resources.
- The integrated approach is appreciated. It should start at community level and influence government
- Bottom-up approach should be enforced. This ocean planning process is appreciated

Additional Comments: (Individual input by George West (Secretary/Trustee of Reef Islands Society of Ecoculture, Reg. No. T130/2016)

1. What activities happening now?

- Agro-forestry and Agri-business, no manufacturing, so no value adding, so miniscule foreign exchange.
- Subsistence Agriculture/fisheries/governance.
- Hunting & gathering, artisanal fishing, commercial fishing
- Foraging/natural resources harvesting – insane approach.
- Logging and destruction of non-renewable resources and wildlife habitat.
- Soil erosion and nutrients wash down to the seas.
- Land & sea pollution, prospecting for sea bed minerals
- Rivers and lakes pollution and course diversion.
- Species depletion following ecosystem destruction. Soil depletion, increase pests, prevalent hunger.
- Gene bank depletion, loss of potential drug sources.

- Land shortage and increasing disputes – No development
- Rising human population, open season.
- Rising human needs and rising foreign fish poaching.
- Rising and uncontrolled human desires.
- Beaches and seas pollution and siltation.
- Destruction of corals and marine lives habitats.
- Reduction of marine lives, reduction of sea food.
- Sea level rise and its dire consequences.
- Contracted economic activities, increase illiteracy.
- Unhealthy population, increased disability.
- Rising dependency, weak governance.
- Sustainable poverty – sustainable corruption

2. What we want happening?

- Strong and participation grassroots government.
- Sustainable and vibrant eco-cultures.
- Vibrant cultural and industries based on cottage industries and natural endowments and their comparative advantages.
- Sustainable harvesting of non-renewable resources
- Development of Arts/music and ethno theatre
- Establishment of more poly-techs to address cultural and specific, e.g, appropriate technologies can be made to handle specific productive needs, like mechanized cassava or coconut scraper/oil extractor etc...
- SIG to give direct grants/subsidies to cultural industrialists and ethno artists.
- SIG to give direct grants to mothers and children of disabled fathers or vice versa.
- Compulsory institutionalized education for all.
- Strong natural resources protection Act to be policed by all stakeholders including civil society
- Open and free non-monopolized telecommunications.
- Strong political will to control international borders to protect our sovereignty and sea bed and under seabed resources plus the resources in the seas.
- Strong government to take control of our air space
- Legislated equitable redistribution of national resources based on a formulae that considers the inputs of each region of the country.
- Outlaw the use of big money by candidates in elections.
- Parliament to have 3 chambers; one for women, one for elders and one for youths – all of them to work voluntarily, no pay.
- CDF to be given to women, men can have PDF

- All Ethno-nations to be autonomous in free association with the sovereign state of Solomon Islands, which consist of public servants on SIG's pay roll and other volunteers. Empower community leaders.
- One Police patrol boat must be based in Lata to Police the Eastern parameter, 2 in Shortlands, one in Lord Howe and one at Mbokona bay as well as one at Indispensable reef. This is to stop fish poaching.
- Reduce the size of all Ministries, except the Ministry of Tourism and Fisheries. Sell the Ministry of Agriculture to farmers so they can run it on profit bases.
- Establish good relations with OPEC nations.
- All provinces need to have fish processing establishment and visitor processing centres.
- Foreign fishing vessels to be reduced progressively as all the provinces take over their roles/operations.
- Aqua culture and mariculture need to be stepped up.
- All provinces need international standard hospitals.
- Outlaw corruption in government/public service
- Outlaw unemployment and vagrancy.
- SIG to have a small air force to police our Maritime boundaries by air.
- Outlaw the receipt of money plus other favours by voters.
- Ban bechdemer exports, go into value adding
- All language groups to record all biological systems and species in their dialects and languages – add to biological name.

3. What we want to stop now?

- Weak centralized governance.
- Weak centralized policing
- Weak centralized development admin
- Monopolistic powers
- Discretionary powers
- Ministries with double bank account
- Corruption in Ministries
- Hopeless Ministries like Agriculture and Commerce and Forestry.
- Unnecessary Logging
- Unnecessary Mineral Prospecting
- Export of unprocessed resources
- Fish poaching
- Fish receipts poaching
- Treatment of Ministry of Fisheries as a private business
- Stop triple Enterprises in government.

- Stop uncontrolled harvesting of finite natural resources.
- Stop just looking at the Ontong Java plateaus issue
- Stop giving CDF to MPs – Illegal
- Stop forgetting Us in the Provinces
- Stop monkeying around in government office
